LAST EDITION

LEVY'S CATS LEFT BEHIND.

Kittens Came and the Neighbors Are Distracted.

Bergh's Society, Police and Health Departments Called In.

Lawyer Jefferson M. Levy and his family are departing in the surf, and ten days ago closed up their residence at 90 East Thirty-fourth street.

There were two of them ten days ago, when the Levys went to the seaside—a big old fellow striped in yellow and white and a matronly Tabby as black as Chioce.

There were seven of them yesterday. There are six to-day, and thereby hangs a tale.

Capt. Tom Bell's police squad are interested in those cats. So is the Bergh Society for the Prevention of Cruelty to Animals. So is the Health Department.

But none else is so much interested as Mr. Levy's next-door neighbor, Mrs. Smith. Her husband belongs to the Union Club, and they are in society, but Mrs. Smith finds time to be very much interested in those cats in large and small numbers.

The yellow cat was in the back yard, an inclosure about twenty-five foot square around which is a high white fence. Thomas could not see the fence, and so amused himself by howling and yawning till Mrs. Smith's ears were sore.

But Tabby, confined in the iron-grated basement vestibule, under the high brown stone stoop, capped the climax by surrounding herself with five awfully cute, awfully black and awfully hungry kittens a few days ago.

Since the advent of the "kitts" Mrs. Tabby has been receiving the compliments of the season from innumerable cat callers who have besieged Mamma Tabby by night and day, the result being an increase of the howling, front and rear, proportionate to the increase in dimensions of the aching void where choice chops and milk ought to be.

Mrs. Smith, tired of listening to Tabby's wall from her window, repaired to the rear parlor and listened to Thomas for a time. But after a few days and nights, even this grew monotonous, and Mrs. Smith nervously penned a note to Supt. Hanksinson, of the Bergh Society.

She wrote: "The people next door went away ten days ago, leaving an old cat in the yard, where she can't get out and is starving. There are also another cat and kittens in the front area and the odors are fearful on our front stoop."

Officer Gray, the Health Department, was dispatched to the scene. He shot and killed the cat and weak old Thomas in the back yard, but found that he could not get at Mrs. Tabby and her babies.

So he notified the Mutual District Messenger agent at No. 1209 Broadway, who has the keys to the house, that Tabby and babies must be cared for, or else brought to the Society's office in a basket.

The messenger slid saucers of milk under the grated gate for Tabby, and is now debating whether to continue as caterer or to assume the responsibility of removing the little family "in a basket," as directed.

Mean time Capt. Bell's squad has detailed a man to look into the matter, and the Health Department will be called upon to take a hand in the game, for Thomas remains must be decently interred and the Tabby nuisance must be abated.

What will you do with Tabby and family if they are brought to this office? an Evening World reporter asked Supt. Hanksinson.

"They will be sent to our stables when Lord High Executioner Max Drang will place them in an air-tight tank, turn on the gas which will cause them to sink through a tube, the cats will sink into a powerful slumber and in four minutes they will be ready for the undertaker."

We saw 350 cats from starvation every morning. People leave town and their cats behind. Sometimes the cats are locked into the house or yard or behind the area gate, and the neighbors call our attention to them, and we save them."

Save them as you have described—for death?"

"Oh, yes; we assume that people who thus neglect their cats do not prize them very highly, and so we put them to a painless, speedy death. Of course, having shot and killed Thomas in Mr. Levy's back yard our duty is done."

"It is for the persons in charge to remove the cats, and they are responsible to the Health Department."

CHICAGO'S AWFUL PERIL.

Pestilence Will Follow If the Hot Spell Isn't Broken.

(SPECIAL TO THE EVENING WORLD.)

CHICAGO, July 1.—Chicago has been frequently remarked upon as being one of the hottest of places when it is hot, and one of the coldest of places when it is cold.

The force of the first of these declarations has never been so terribly felt as during these scorching days.

Though a shower at midnight had a slight cooling effect, this morning started in with a temperature of 72 degrees.

The morning was clear, hot, and there was a hot sun, but it did not rise to clear the temperature up the scale again as it has been doing day for ten days.

The talk about dangers of pestilence is the idle. The peril is a real one. Sickened, death and decay are fostered by the terrible heat.

Relief may yet come to-day, but if it does not, or if a cooler wave does not come within twenty-four hours, nobody can tell what new horrors may spring upon us.

The deaths from all causes reported during yesterday numbered nearly two hundred. Deaths from heat prostration for the week past are estimated at between sixty and seventy.

Heat Drove Him to Suicide.

(SPECIAL TO THE EVENING WORLD.)

INDIANAPOLIS, July 1.—Joseph Hales, aged twenty-six, crazed with heat prostration, attempted suicide last night by cutting his throat. He was overpowered and removed to the City Hospital; but when the attendant was not looking, he sprang from the third-story window and was killed.

Knapp's Root Beer Extract.

Make Root Beer yourself. No "fictitious" necessary; a perfect home drink. Ten gallons for \$50.

If You Use Tobacco or Stimulants, You certainly should use Carter's Little Liver Pills.

FOREIGN NEWS BY CABLE.

An Astonishing Charge of Official Robbery in Spain.

Bismarck Accepts a Reichstag Candidacy—General Notes.

(REUTERS CABLE NEWS SPECIAL.)

MADRID, July 1.—There is a decided sensation here over the statement of Senor Romero Robledo, in Congress, that during the five years the Liberals have been in power 450,000,000 reals of the public money were stolen by officials.

A New York Woman the First to Ascend the Jungfrau.

(REUTERS CABLE NEWS SPECIAL.)

GENEVA, July 1.—The first ascent of the Jungfrau this year was made by Miss Gerda Lerna, of New York.

The ascent is certified by Guides Lidler and Albricht, who accompanied her.

Cases Believed to Be Cholera Reported in Oporto.

(BY CABLE TO THE PRESS NEWS ASSOCIATION.)

MADRID, July 1.—It is reported that several cases of what is believed to be cholera have been discovered in Oporto.

An International Court to Decide East African Disputes.

(BY CABLE TO THE PRESS NEWS ASSOCIATION.)

ROME, July 1.—England, Germany and Italy have agreed to the establishment of an international court of justice at Zanzibar for the purpose of deciding the disputes on the eastern coast of Africa.

Showmen Said to Have Fed a Tramp's Body to the Bears.

(BY CABLE TO THE PRESS NEWS ASSOCIATION.)

VIENNA, July 1.—A remarkable story reaches here from Bistritz, in the northern part of Hungary.

A party of itinerant bear tamers, with their animals, had an altercation on the highway with a tramp, who was killed in the heat of the fight by the showmen, and his body was fed to the bears.

Bismarck Officially Accepts a Candidature for the Reichstag.

(REUTERS CABLE NEWS SPECIAL.)

BREITENBURG, July 1.—Prince Bismarck has officially accepted the candidature to represent Kaiserlauten in the Reichstag.

A London Singer Coming—A Noted Composer Falls.

(REUTERS CABLE NEWS SPECIAL.)

LONDON, July 1.—The clever, comic opera singer, Marie Tempest, sails for New York on Thursday.

Singer Told Matter, the well-known composer, has fallen.

"The Evening World" Will Celebrate the eve of the Glorious Fourth with a Red, White and Blue issue on July 3.

PLENTY OF WATER COMING.

Only One Link of the New Aqueduct Left Uncompleted.

Provisions for the Supply of Residents North of the Park.

The pipe line from the gate-house of the new aqueduct at One Hundred and Thirty-fifth street and Convent avenue to the reservoir in Central Park is completed, and the four big iron conduits, each 48 inches in diameter, are ready to pour their 125,000,000 gallons of water daily into the reservoir.

The capacity of the reservoir is 318,000,000 gallons per day, but only 125,000,000 gallons are to reach the lakes.

Sixty-eight millions of gallons are reserved for the future supply of the Amusement District, with a probable reservoir at Jerome Park.

The balance—250,000,000—is to be brought to Manhattan Island, and it starts out in the pipe line which leaves the gate-house at eight o'clock.

One of these is dropped at One Hundred and Twenty-fifth street, another at Manhattan street, a third at One Hundred and Tenth street, and the fourth at One Hundred and Tenth street.

The reservoir with half the supply of water which is brought to the island.

The pipe line will not be accepted from the contractors O'Brien & Clark at tomorrow's meeting of the Amusement Commission, for the final estimates are not complete and will not be for several days.

Contractor Herman Clark is working diligently night and day to complete the repairs in his section of the aqueduct, and it was reported at the office of Chief Engineer Foley this morning that his work will be finished in time for the opening of the big conduit prior to July 15.

That the water is very much needed is demonstrated by the great drafts made on the present supply, because of the hot weather.

There was but 23 feet 4 inches of water in the reservoir this morning, and yesterday but half an inch of water was running over the crown of the croton dam. This is lower than the water supply has been in a year.

Baseball To-Day.

Regularly scheduled games:

Brooklyn at Cleveland. New York at Pittsburgh. Philadelphia at Chicago.

American Association. Athletic Association. Brooklyn at Louisville. Jersey City at Newark. Hartford at Washington.
